

Dear Participants,

We are pleased to inform that we came to agreement with Elsevier that full papers of oral and poster contributions will be published in a special issue of *Radiation Physics and Chemistry*. All the manuscripts **will be subjected to a standard peer-review procedure using the same criteria as for regular papers.**

The manuscripts should be submitted to *Radiation Physics and Chemistry* in electronic form using the EVISE system (similar to regular papers submitted to this journal). Please follow the journal guidelines for authors available at the journal homepage

<https://www.journals.elsevier.com/radiation-physics-and-chemistry/>

The submission window **will be open from July 15 to September 30. You should choose special issue for IRaP 2018 when submitting your manuscript.** The manuscripts will be published as soon as they are accepted. No printed volume of the proceedings will be distributed. The electronic copy of the Virtual Special Issue could be available upon request.

**Important notes:** only the contributions actually presented at the IRaP 2018 Symposium will be published in the special issue and **each participant can submit only one manuscript** for this issue. **The manuscript length is restricted to 8 journal pages for invited papers and 6 journal pages for contributed papers.**
